4/9/71

Dear Howard,

After I wrote you earlier today, a Post reporter, who remembered the New Left report, promised me a copy.

So, until I see if I get it, don't try there.

However, if you have a chance to talk to those reporters or probably better, to Kenyatta, it would be good to know if there are any others using initials or descriptions PSI and SI, and a description of the code identifications of the minor agents. Are they of numbers, letters, combinations, etc. I think you understand my interest.

I have no psecial interest in connecting identifications with names, but if there is an apparent link between them and offices or cities, that could be interesting.

If, for example, such identifications are in numbers, it would be helpful to know if there is consistency, i.e., four digit, five digit, and whether there is a difference for PSIs and SIs in the numbering system for these categories.

It may not be possible to learn these things, but if it is, it can be quite helpful.

Sincerely,
